

RestorePoint

Data protection made simple.

What Our Customers Say...

Faster, easier restoration

“Restore Point has helped Equity One deploy an efficient and reliable data protection system. The product and service provided by RestorePoint allowed us to eliminate our tape backup solution which required more maintenance time than the RestorePoint solution. No longer do we need to maintain and track offsite and onsite tapes. We have reduced our restore times dramatically by not having to look thru a tape library to find the data we want to restore. Our backed up data is available to us 24x7 for restores with no restrictions on bandwidth or amount of data to restore. We have worked with the RestorePoint team since early 2000.”

Ivan Demoya

*Director of Information Technology
Equity One Inc.*

Disaster
Recovery

No matter where or when you need us

“Our company spans multiple countries. Management of our backups as well as the retention and the quality of the backups were the driving forces behind our decision to use RestorePoint. The flexibility and ease of use of the solution helps Atrium backup and restore data as needed with the utmost security and adhering to all governance requirements. Most of all what makes RestorePoint stand out from the rest is the professional service and support they provide. Regardless of the time or place in the world, their staff is always there to help if we need them.”

Data
Protection

Secure against disaster

“RestorePoint has been the anchor of our DR Plan for several years. The engineering staff is extremely knowledgeable, responsive, and dedicated to supporting their products. Having our data encrypted and secured with RestorePoint’s physical and logical N+1 architecture keeps our company in compliance with the strict regulations we must meet. We are always notified of potential issues or inconsistencies with our data, routine maintenance, cost savings, and new product features that are being developed. At the end of the day, it is very clear why we partnered with RestorePoint to provide the most imperative tier of our DR Plan.”

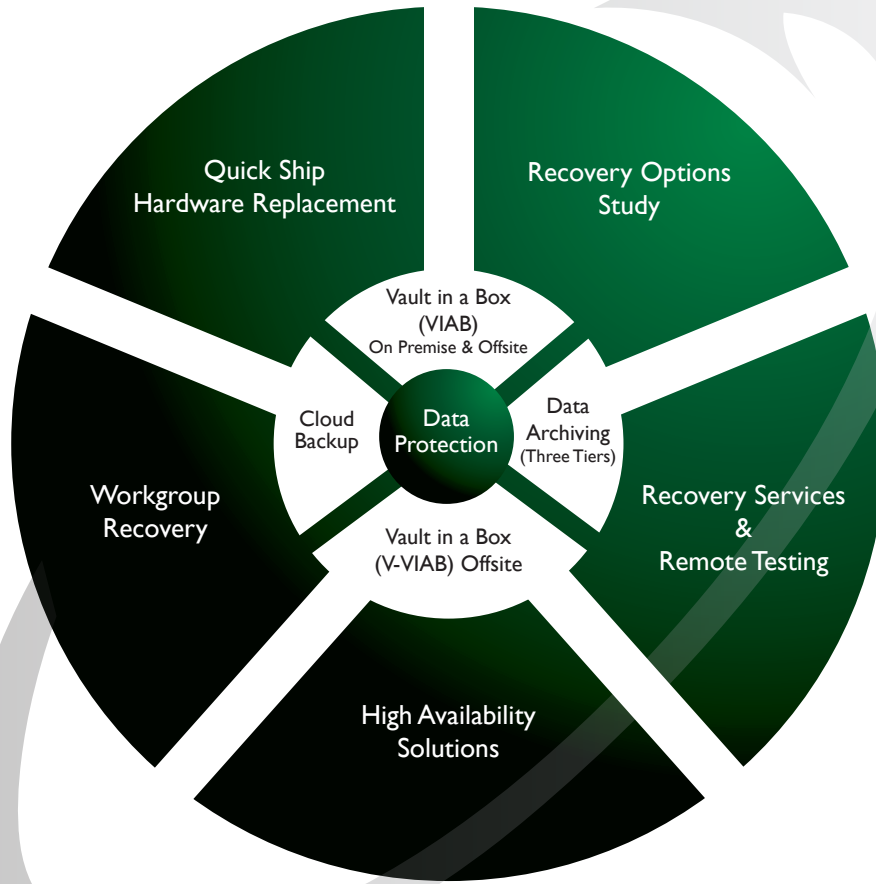

*John Scarborough, CIO
